CS 197C: Quiz 1

This is mainly a "process" quiz — I want to make sure you know how to submit work in Spark. The website is: `http://spark.oit.umass.edu`.

Please answer the following question by writing it up in a plain ASCII text file (the kind of file you make in NotePad or TextEdit - it'll save as a .txt), and submitting it to Spark as `Q1.txt`:

What would you like to get out of the C++ class?

Your answer may be as complex or a simple as you like. Note that an empty file actually fails to answer the question — so I'll need at least one word.
